Symbol Details

Wild Symbols

The Wild Joker , Wild Chicken and Cai Shen symbols in Joker's Luck and Gluck's Joker, in Vinci la Gallina and in Cai Shen Lai Le game respectively substitute for all symbols, except Red Joker, Wolf and Dragon, and upgrade the progress of all towers once landing on the reel.

Reset Symbols

The Red Joker , Wolf and Dragon symbols in Joker's Luck and Gluck's Joker, in Vinci la Gallina and in Cai Shen Lai Le game respectively reset the progress and Cashpot to 0.

Game Rules and Features

Joker's Luck is a 1-reel slot with 3 paying symbols that are associated with corresponding payout towers.

Every landing symbol upgrades the corresponding tower by 1 level and this payout is added to the Cashpot. The Wild Joker symbol updates all towers by 1 level.

When one tower is completed, it gets highlighted. If one more symbol of the corresponding tower or the Wild Joker lands on the reel, its highest payout will be collected immediately as a Direct Win.

A player can collect the winnings from the Cashpot at any time or continue collecting symbols to get the Bonus Prize. When 3 triangles on all towers are highlighted, the Bonus Prize is awarded.

After the Bonus Prize has been collected, the triangles disappear, but a player can continue collecting symbols and get immediate cash payouts that go directly to the balance.

The Bonus Prize can be won again only after collecting the Cashpot.

Cashpot

The Cashpot displays the sum of current highest level wins of each tower. A player can collect the Cashpot immediately or continue collecting symbols to win the Bonus Prize.

The button Collect moves the win from the Cashpot to the balance and switches all towers to stage 0.

Bonus Prize

The Bonus Prize feature is triggered after all towers get highlighted and the Cashpot is full. Once the feature was triggered, a player gets the Bonus Prize shown above the towers.

Note that the Bonus Prize win amount is not added to the Cashpot and goes directly to the balance.

The Bonus Prize can be won again only after collecting the Cashpot and refilling all towers from the start.

Casino's Exposure

The casino's maximum exposure from a single game round is limited by the win capping mechanism. The win capping defines that the total win from a single game round cannot exceed 500,000 Euro. Should the total win from a game round exceed this number, the total win will be capped.

Top Win information per bet got during simulation of 1,000,000,000 bets:

Highest win	900 x Total Bet
10th highest win	900 x Total Bet
100th highest win	900 x Total Bet

It is highly unadvisable to exceed the pre-set win capping values and game limits.

Game limits of all new games must ALWAYS be reviewed by the casino operator prior to the game's release to players. Failure to set the required maximum limit may result in the casino's exposure to large player wins.

As always, licensees are welcome to contact their Account Manager for further assistance in understanding and configuring game limits and updates of coin values.

Game History Screenshots

Unlike many traditional slot games, **Joker's Luck** is unique with only one reel and the single position for one out of 5 symbols to land on.

The winning amount on towers changes with the bet amount. To get a win directly into the balance, a player needs to fill one or more towers completely. Other winnings are collected into the Cashpot, where a player can transfer all amount into the balance pressing the button "Collect". A player can change the bet only after the Cashpot is empty. A game round begins when the player presses spin and continues until they collect the Cashpot or the Red Joker lands, resetting the towers and Cashpot to 0. One game round can contain several spins.

The game has not the turbo mode, but has a specific autoplay, a player can choose the number of spins and Cashpot limit.

1. This set of screenshots shows the unfinished game round that consists of 2 spins. A player continues spinning and accumulating winnings into the Cashpot without transferring them into the balance.
