Casino's Exposure

The casino's maximum exposure from a single game round is limited by the win capping mechanism. The win capping defines that the total win from a single game round cannot exceed 500,000 Euro. Should the total win from a game round exceed this number, the total win will be capped.

Top Win information per bet got during simulation of 1,000,000,000 bets:

Highest win	2,507 x Total Bet
10th highest win	2,062 x Total Bet
100th highest win	1,603 x Total Bet

It is highly unadvisable to exceed the pre-set win capping values and game limits.
