1. Introduction

This document illustrates the way to report SM_RESULT for the Tiki Secret™ game in Portugal.

2. Grid Size

Tiki Secret™ game is based on 5x4 reel matrix (**Figure 1**):

Figure 1 - appearance of the Tiki Secret™ game matrix.

The following symbols positions are used in the game (**Figure 2**):

00	**10**	**20**	**30**	**40**
01	**11**	**21**	**31**	**41**
02	**12**	**22**	**32**	**42**
03	**13**	**23**	**33**	**43**

All Rights Reserved

3. Ways wins

- This game is all ways 1024.
- Matching symbols on adjacent reels from left to right form winning combinations regardless of the symbol position on the reel.
- Only the highest winning combination from left to right and right to left pays.

All Rights Reserved

4. Mapping of Symbols

The following table (**Table 1**) describes the mapping of symbols to report in the SM_result. The table contains 4 columns:

- Symbol Name: Internal name of the symbol, defined by the game rules. It's not used in the report and provided for clearer differentiation of symbols.
- Symbol Server Code: Symbol code used by the server, and which will be reported in SM_result as part of the game round output.
- Image: The graphical appearance of the symbol, used in the game.
- Comment: explanation for the symbols reporting.

Symbol Name	Symbol Server Code	Image	Comment
Wild	0		• Appears on reels 2, 3, 4 and 5 only. • Can be stacked of 3 or 4 symbols high on reels 2, 3 or 4 only. • Stacked symbols are reported in sm_result as symbols with id=0 displayed one by one on the same reel. • Triggers Respin feature, when covers the entire reel 2, 3 or 4. • Substitutes for all symbols except Scatter.
Nudged Wild	09		• Appears on reel 2, 3 and 4 only • Indicates the direction and number of shifted positions in Nudge feature • Appears in spin or free spin operations only
T1	1		• Can be stacked of 3 or 4 symbols high on reels 2, 3 or 4 only. • Stacked symbols are reported in sm_result as

5. Nudge feature

During base game and Free games Nudge feature can randomly occur when:

- a stack of 2 or 3 symbols (id=1, 2, 3, 4, 5, 6, 7, 8, 9 or 10 from **Table 1**, placed one by one) on the reel 2, 3 or 4 participates in the winning combination created from the same symbol only;
- **Note!** a stack of 2 or 3 Wild symbols (id=0 from **Table 1**, placed one by one) on the reel 2, 3 or 4 can participate in several winning combinations.

When Nudge feature is triggered, the reel shifts:

- by 1 position up, the same extra symbol will be added above the stack and reported as id=09, 19, 29, 39, 49, 59, 69, 79, 89, 99 or 109 from **Table 1**;
- by 1 position down, the same extra symbol will be added below the stack and reported as id=09, 19, 29, 39, 49, 59, 69, 79, 89, 99 or 109 from **Table 1**;
- by 2 positions up, the same two extra symbols will be added above the stack and reported as id=09, 19, 29, 39, 49, 59, 69, 79, 89, 99 or 109 from **Table 1**;
- by 2 positions down, the same two extra symbols will be added below the stack and reported as id=09, 19, 29, 39, 49, 59, 69, 79, 89, 99 or 109 from **Table 1**.

Note! The reelset before Nudge feature is not reported in sm_result. Final screen is formed after Nudge feature and only final screen is reported in sm_result.

If the reel 2, 3 or 4 fully covered after Nudge feature, Respin feature is triggered.

Nudge feature can be triggered on one reel and on spin or free spin operations only.

Nudge feature can not be triggered if there is at least one Scatter (id=11 from **Table 1**) symbol on the reels.

During Free games if Respin feature is triggered after Nudge, multiplier is awarded depending on the number of added extra symbols (id=09, 19, 29, 39, 49, 59, 69, 79, 89, 99 or 109 from **Table 1**):

- if the reel shifted by 2 stop positions, multiplier x3 is awarded;
- if the reel shifted by 1 stop position, multiplier x2 is awarded.

The multiplier will be applied to all wins from spin and the following respin operations.

6. Definitions

The following definitions will be applied in sm_result report:

- **MV** - a total bet amount placed for the operation. It reports the value in Euro.
  Example: MV=4.5 means that player places bet 4.50 EUR.
  There is no bet for Respin and Free Spin operations - MV will be 0.
- **MG** - a total win amount for the operation paid to the player's balance. It reports the value in Euro.
  Example: MG=3.5 means that player wins 3.50 EUR.
  There is no payment to the player's balance for operation without reward - MG will be 0.

In case if operation has some reward, the report of this operation will contain the Retribution List. The following definitions will be applied in the Retribution list of the sm_result report:

- **MT** - a multiplier applied to each separate reward in the operation.
- **MR** - a win amount for each separate reward in the operation. It reports value in Euro.
  Example: MR = 2.5 means that player wins 2.50 EUR.

Notes!

- Total bet for the round is not reported in the sm_result and can be defined as a sum of all MV values provided in the report for each operation in the round.
- Total win for the round is not reported in the sm_result and can be defined as a sum of all MG values provided in the report for each operation in the round.
- If the generated sm_result field has more than 4000 “chars”, it's “truncated” even if the record loses some information in the report.
