	Low Wins	Medium Wins	High Wins																					
The table shows the relative RTP paid out by low, medium, and high wins in the game.																								

Business Case

- The hottest game in town
- Expanding Wilds on reels 2, 3 and 4
- Mystery symbol reveal

Symbol Details

Wild Symbol

The Wild symbol  appears only on reels 2, 3 and 4 during the main game and Predictor feature round.

The Wild symbol  substitutes for all symbols on the same reel except for Scatters  and .

Scatter Star Symbol

The Scatter Star symbol  appears anywhere on the reels during the main game and Predictor feature round.

Scatter Trident Symbol

The Scatter Trident symbol  appears on reels 1, 3 and 5 during the main game and Predictor feature round.

Game Features

Expanding Wild

The Wild symbol appears on reels 2, 3 and 4.

If contributing to a win, any Wild appearing on reels 2, 3 and/or 4 will expand to cover all positions on that reel.

Any wins will then pay according to the win lines.

Predictor Feature

The Predictor feature is triggered randomly during the main game round, landing 1, 2 or 3 Wild symbols on reels 2, 3 and/or 4.

Once the feature is triggered, the Wild symbol/s expand as the other reels continue to spin. When all reels stop, wins pay according to the paylines.

During the Predictor feature Wild symbols can reveal or substitute for any symbol except for the 2 Scatter symbols (Scatter Star and Scatter Trident).

Gamble Feature

The Gamble feature can be triggered after any win by clicking on the flashing Red/Black spade icon at the bottom of the screen.

The player then tries to predict the next card at the top of the screen, choosing either Red or Black.

If Red or Black choice is correct, the Gamble amount is doubled (x2). If their choice is incorrect, the Gamble amount is lost, and the gamble game round is finished.

The Gamble feature can also be automated by clicking on the spade icon, which is white when the game is idle.

After clicking the white spade icon, the Gamble Settings window appears where the player may change the range of wins needed to launch the Gamble feature.

When the win settings are matched the player will enter the Gamble feature game.

Casino's Exposure

The casino's maximum exposure from a single game round is limited by the win capping mechanism. The win capping defines that the total win from a single game round cannot exceed 500,000 Euro. Should the total win from a game round exceed this number, the total win will be capped.

Top Win information per bet got during simulation of 1,000,000,000 bets:

Highest win	1,105 x Total Bet
10th highest win	1,105 x Total Bet
100th highest win	1,105 x Total Bet

It is highly inadvisable to exceed the pre-set win capping values and game limits.

Default Coin Bet Values at Upload

Skywind will upload the game with the below default Coin Bet values (the coin marked in **bold** is the default selected coin bet for all players as they enter the game for the very first time):

CURRENCY	COIN BETS	BET OPTIONS

Please contact the Skywind support team if you want to make changes in the Coin values.

Game limits of all new games must ALWAYS be reviewed by the casino operator prior to the game's release to players. Failure to set the required maximum limit may result in the casino's exposure to large player wins.

As always, licensees are welcome to contact their Account Manager for further assistance in understanding and configuring game limits and updates of coin values.
