## Casino's Exposure

---

The casino's maximum exposure from a single game round is limited by the win capping mechanism. The win capping defines that the total win from a single game round cannot exceed 500,000 Euro. Should the total win from a game round exceed this number, the total win will be capped.

Top Win information per bet got during simulation of 1,000,000,000 bets:

|                               |                     |
|-------------------------------|---------------------|
| Highest win                   | 2,056.0 x Total Bet |
| 10 <sup>th</sup> highest win  | 1,805.3 x Total Bet |
| 100 <sup>th</sup> highest win | 1,383.9 x Total Bet |

It is highly unadvisable to exceed the pre-set win capping values and game limits.

Please contact the Skywind support team if you want to make changes in the Coin values.

Game limits of all new games must ALWAYS be reviewed by the casino operator prior to the game's release to players. Failure to set the required maximum limit may result in the casino's exposure to large player wins.

As always, licensees are welcome to contact their Account Manager for further assistance in understanding and configuring game limits and updates of coin values.
